

MOHD SAKIB

Java Full Stack Developer | Spring Boot | React.js

Shamli, Uttar Pradesh, India | +91 7505305400 | mohdsakib481@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on project experience building secure, full-stack web applications using Java, Spring Boot, and React.js. Skilled in developing RESTful APIs, implementing JWT-based authentication, and enforcing role-based authorization with Spring Security. Experienced in integrating relational databases (MySQL) using Spring Data JPA/Hibernate and connecting React.js frontends to backend services via Axios. Comfortable working across the full stack, with additional exposure to Laravel for web application development.

KEY STRENGTHS

- **Full-Stack Development:** Hands-on experience building applications end-to-end with React.js on the frontend and Spring Boot on the backend.
- **Animated User Interfaces:** Experience integrating animations and interactive elements using GSAP and React.js for a smoother user experience.
- **API & Database Management:** Comfortable designing and consuming RESTful APIs with Spring Boot, backed by MySQL for data persistence.
- **Backend Architecture:** Experience implementing authentication, authorization, and backend business logic using Spring Boot and Spring Security.

TECHNICAL SKILLS

Languages: Java, JavaScript, PHP, HTML5, CSS3, SQL

Backend: Spring Boot, Spring Security, JWT, REST APIs, Spring Data JPA, Hibernate, Laravel

Frontend: React.js, React Router, Axios, GSAP, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS

Database: MySQL, H2

Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Eclipse

PROJECTS

Hospital Management System | *React.js, Spring Boot, Spring Security, JWT, MySQL, Spring Data JPA/Hibernate*

- Developed a full-stack hospital management application with a React.js frontend and a Spring Boot REST API backend.
- Implemented JWT-based authentication with Spring Security to secure API endpoints and manage user sessions.
- Designed role-based access control for Admin, Doctor, and Employee roles, restricting protected frontend routes and backend endpoints by role.
- Built core modules for patient management, doctor management, and appointment scheduling, including appointment status handling (Pending, Confirmed, Completed, Cancelled).
- Modeled and persisted relational data in MySQL using Spring Data JPA/Hibernate.
- Integrated the React.js frontend with backend REST APIs using Axios, including form validation and API error handling.

Saree E-Commerce Website | *React.js, JavaScript, HTML5, CSS3*

- Built a responsive Saree e-commerce website using a React.js component-based architecture.
- Developed reusable UI components for product/category browsing and product detail views.
- Implemented client-side navigation across multiple pages and sections for a smooth browsing experience.
- Designed a responsive layout optimized for both desktop and mobile devices.
- Applied modern UI animations and transitions to enhance the shopping experience.
- Focused on clean, product-focused visual presentation, delivering a portfolio-quality frontend implementation.

EDUCATION

Bachelor of Computer Applications (BCA)

DAV College, Muzaffarnagar (MZN) | 2024
